

GOLDEN

KEY SYSTEM

The new standard for FB Keys

Improve **Control**. Improve **Security**.

The **Golden Key** Concept provides

Fire brigade access to properties from housing providers with just one key

- Main entrance
- Service areas inside and out
- Bin Stores / bike stores / lift motor rooms / tank rooms / loft hatches / risers
- Gates / barriers / shutters / grilles

The **Golden Key** Concept provides

Higher security alternative to current systems with greater flexibility and wider application

- Dead locks / sash locks / electronic switches / padlocks / night latches

The **Golden Key** Concept provides

Better quality locking product and key design

- Quicker access
- Stronger construction
- Easily identifiable key and lock products
- Less bulky Key design for storage

No fire brigade budget issues for keys as they are currently free

How the **Golden Key** came about

Our experience of large housing providers has shown that FB keys are cheap and readily available to anyone, removing any security that they once provided.

Problems the **Fire brigade** Face

Notifications of **Lock Changes**

When a lock is changed and/or fitted, an email is generated for the local Fire Brigade Service to notify them that access is via the Golden Key.

Location specific

Ease of use for **Fire Brigade,** Empowering **customer with choice**

In Summary

- Making it easy for the fire brigade
- Giving the customer choice
- limited options at present.
